DETAILED ACTION

1. Acknowledgment is made in the receipt of the information disclosure statement and preliminary amendment filed June 17, 2005, the oath filed February 21, 2006, and the information disclosure statement filed February 5, 2007.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1, 6-23 and 25-27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-6, 11-23 and 28-30 of prior U.S. Patent No. 7,000,909 to Kellam et al. This is a double patenting rejection.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 2-5, 24 and 28 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3-6, 24 and 25 of U.S. Patent No. 7,000,909.

An obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but an examined application claim is not patentably distinct from the reference claim(s) because the examined claim is either anticipated by, or would have been obvious over, the reference claim(s). See *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985). Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 2-5, 24 and 28 are generic to all that is recited in claims 3-6, 24 and 25 of U.S. Patent No. 7,000,909. As such claims 3-6, 24 and 25 of U.S. Patent No. 7,000,909 fully encompass the subject matter of claims 2-5, 24 and 28 and therefore anticipate claims 2-5, 24 and 28. Thus the invention of claims 3-6, 24 and 25 of the patent is in effect a "species" of the "generic" invention of claims 2-5, 24 and 28. It has been held that the generic invention is anticipated by the species, see *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims 2-5, 24 and 28 are anticipated (fully encompassed) by claims 3-6, 24 and 25 of the patent, claims 2-5, 24 and 28 are not patentably distinct from claims 3-6, 24 and 25, regardless of any additional subject matter present in claims 3-6, 24 and 25.
